🏛 The Pennsylvania State University
Philosophy Department
227B Sparks Building
University Park, PA 16802
🌐 [Faculty Profile](#)

Positions

- 2024– Associate Teaching Professor of Philosophy, Penn State.
2014– Teaching & Learning with Technology Coordinator, Penn State.
2012–2024 Assistant Teaching Professor of Philosophy, Penn State.
2007–2007 Lecturer in Philosophy, Indiana University–Purdue University Indianapolis, IUPUI.

Education

- 2007–2012 *Ph.D. in Philosophy*, Penn State, University Park, PA.
Dissertation: *Pragmatic Minimalism: A Defense of Formal Semantics*.
Committee: Vincent Colapietro (co-chair), Emily Grosholz (co-chair), Christopher Long, and Linda Selzer.
2004–2010 *M.A. in American Philosophy*, IUPUI, Indianapolis, IN.
Thesis title: *Vagueness and Its Boundaries: A Peircean Theory of Vagueness*.
Committee: Cornelis de Waal (chair), André De Tienne, and Nathan Houser.
2001–2004 *B.A. in Philosophy*, IUPUI, Indianapolis, IN.
2001–2004 *B.A. in English*, IUPUI, Indianapolis, IN.

Research and Teaching Interests

Classical American Philosophy (esp. Peirce, Royce), Philosophy of Language, Symbolic Logic, Metaphysics (esp. temporal ontology), Critiques of Wellness.

Books

2. *In progress*. Agler, D. W. (c. 2024). *Symbolic Logic: Syntax, semantics, proof*. **2nd ed.** Lanham: Rowman & Littlefield.
1. Agler, D. W. (2013). *Symbolic Logic: Syntax, semantics, proof*. Lanham: Rowman & Littlefield.

Courses Taught

PHIL 001	Introduction to Philosophy
PHIL 003	Philosophy of Well-being
PHIL 004	The Human Condition
PHIL 010	Critical Thinking
PHIL 012	Symbolic Logic
PHIL 013	Philosophy of Nature and the Environment
PHIL 083	Bioethics (First-Year Seminar)
PHIL 101	American Philosophy
PHIL 102	Existentialism and European Philosophy
PHIL 103	Ethics
PHIL 107	Philosophy of Technology
PHIL 110	Philosophy of Science
PHIL 123	Introduction to Media Ethics (First-Year Seminar)
PHIL 125W	Epistemology (Writing Intensive)
PHIL 126	Metaphysics
PHIL137N	Introduction to Philosophy Through Health and Sport.
PHIL 205	American Philosophy
PHIL 297	Philosophy of Sport
PHIL 401	American Philosophy
PHIL 426W	Metaphysics (Writing Intensive)
PHIL 512	Graduate Logic

Undergraduate Independent Studies

9. Topics in Symbolic Logic – Alex Grigas, John Ouligian, Gretha Dos Santos, Madison Phillips
8. Vagueness and the Line-Drawing Fallacy – Matthew Thompson
7. Logics of Vagueness – Seongtaeg Kang
6. Logic and Logic Games – Chloe DeOnna
5. Modal Logic – Michael Challis
4. Classical American Pragmatism and Implicit Bias – Nicholas Charles
3. Decision theory and the holdout problem – Megan Nuggihalli
2. Computation and Complexity – David Friedman and Andres De La Fuente
1. Philosophy of Time – Emily Dorshaw and John Michael Gurklis

Courses Designed

3. PHIL010 - Critical Thinking (web). Over 600 pages of instructional content, developed online exams, practice quizzes, quizzes, discussion forum, instructor's manual, approximately 26 lightboard videos, and supplemental video tutorials.
2. PHIL012 - Symbolic Logic (web). With Mark Fisher. Wrote content, developed online exams, quizzes, instructor's manual, approximately 50 logic videos, and technical video tutorials.
1. PHIL137N – **Introduction to Philosophy Through Health and Sport**. Inter-domain course that introduces students to philosophical ideas and contextualizes them in relation to the concepts of health, wellness, and sport.

Professional Service, Awards, Development, Certificates

- Certificates
- *In Progress*. Harvard's CS50P: Introduction to Programming with Python. **Certificate**
 - Online Course Authoring Certificate. Penn State World Campus Online Faculty Development. Completed: 2023
 - Foundations for Online Teaching Certificate. Penn State World Campus Online Faculty Development. Awarded: 2022
 - Instructional Practice Certificate. Penn State World Campus Online Faculty Development. Completed: 2020
- Awards
- PSU Philosophy Department Joseph J. Kockelmans Award in Philosophy. Awarded 2012.
 - Harold F. Martin Graduate Assistant Outstanding Teaching Award – Penn State Graduate School and Office of the Vice President and Dean for Undergraduate Education. Awarded: 2011.
 - Jean Martin Maxwell Prize for best M.A. Thesis containing a contribution to American Philosophy. Awarded: 2010.
 - Graduate Fellowship. The Pennsylvania State University. Awarded: 2007-2012.
 - IUPUI Summer Research Fellowship. The Peirce Edition Project. Awarded: 2006.
 - IUPUI Research & Graduate Fellowship. IUPUI Philosophy Department & Peirce Edition Project. Awarded: 2005-2006.
 - Co-winner of the IUPUI Philosophy Department Essay Competition, "The Symbolic Self".
- Referee
- Semiotica
 - Routledge
 - Journal of Speculative Philosophy
 - Teaching Philosophy
 - Rowman & Littlefield Publishing Group

Student Evaluations (Qualitative)

- PHIL010 The handouts were much more efficient than other styles of teaching I have experienced. You could follow along without any confusion of where we were, and you never were behind in taking notes. Also, the demonstrations and visual representation of the topics on the chalk board made it much easier to follow along instead of just listening to lecture. It was also very helpful that we covered each topic in the same manner. The order of definition, to clarification, to examples, to creating your own examples consistently helped me learn. - SU2015
- PHIL010 Consistent teaching and class format, material was engaging and the course was the perfect balance of interesting material that the professor explained in a engaging and clear way, and an appropriate difficulty level to the point where the course was never too easy and boring and also never too stressful. – Fall 2020

- PHIL012 Of all online courses I have taken at Penn State, professor Agler has been the most successful at teaching the course and providing ample resources to students, despite the difficult online platform. While the material is difficult to understand, Agler's textbook breaks down the information in a very helpful way. His online discussion board is an invaluable resource to students that find themselves having questions on the material. Even more so, Agler's response time (usually within a few hours) proves his dedication and true care for his students' success. While sometimes difficult to explain, he takes the time to write back to every student's question. He keeps his students alert of upcoming assignments (something that is easy to forget with an online course) by sending out regular emails. - SP2015
- PHIL012 Normally with online courses, I am nervous about the amount of contact I will be able to have with the professor. Professor Agler extends himself to all students and makes sure they are able to contact him and get further help on the course material. He provides continuous updates and is proactive with his students. - SP2015
- PHIL012 Dr. Agler was the most important aspect. I'm not really a math person and was a little bit apprehensive of a class that has many math elements to it, but Dr. Agler sets you up for success by giving you the tools you need to succeed: breakdowns of complex problems in class, detailed videos that he's made online, the textbook and packet which explain just about everything necessary, etc. Dr. Agler has set up the course in a way that if you want to succeed and you put the work in, you almost certainly will. You can tell he's very passionate about the subject by his willingness to help and go above and beyond for his students. He's also a genuinely good and funny guy, which helps him connect with the class and makes class entertaining - FA2021
- PHIL012 Agler was very realistic throughout the course regarding pace and content he was comfortable altering the schedule and material to accommodate the needs of the class. This allowed for extensive review and increased comprehension, especially with the more difficult content in the course. He has a great sense of humor and connected with the students on a level that most college professors are unable to achieve. As a student who ordinarily struggles with math-related classes, he provided an environment that allowed me to excel past my expectations. The youtube videos were also extremely helpful when we were initially learning about truth trees. Overall, interesting (but challenging) class and awesome professor. - FA2015
- PHIL012 The professor was very willing to help out students and re-word the explanations to better understand the concept. He would ALWAYS give real life examples to each new concept to help people understand at an easier level. He also found a tutor for students as well because this is known to be a relatively difficult course. He was an overall kind and understanding guy. - FA2015

- PHIL012 As we near the end of the course, I wanted to thank you for all of your generosity throughout the semester. In my [...] years at Penn State and [...] years of school prior, I have never had an educator more willing to help students learn. On-line classes tend to be more challenging, and having you as a professor made this course significantly less stressful. I was challenged throughout the entire course, but was helped in a way that I actually learned concepts I will take with me. As I study for the LSAT, many techniques of logic learned in this course are extraordinarily helpful. You consistently helped me do my best throughout the course and you never made me feel stupid or like I was bothering you, even though I emailed you multiple times each week. Thank you for being such an outstanding professor, and your eagerness to help students is refreshing. I truly appreciate all of the additional help and encouragement you provided throughout the semester. - SP2017
- PHIL012 Professor Agler makes this class enjoyable. I dreaded taking this class but I can honestly say that I actually enjoyed it. Agler is a very personable guy and it makes a huge difference. Willing to help at anytime and clear up things that his students may be confused on. I would recommend Agler to anyone who has to take this course. – Fall 2021
- PHIL012 David is enthusiastic about what and how he teaches material in class. He makes it interesting and easy to engage with. He provides good examples and can clearly break down complex topics so that we can more easily grasp the bigger picture. He also offers extra credit to encourage and emphasize the importance of practicing the material on our own. He is accommodating and understands that life can get in the way, and he is happy to reschedule exams or accept late work with little to no penalty. – Fall 2021
- PHIL012 The homework that was due before each exam and the study guides we used before each exam helped me do well in the course. The professor was also very good at making sure you understood what was being and offered many opportunities to get additional help. The YouTube videos were also helpful. – Fall 2021
- PHIL012 I love this course, and the professor. I consistently think about how well versed Dr. Agler is in these topics while learning about them in class. He truly cares about his students, and provides all the necessary tools in order to succeed in this course; for example practice exams, videos, definitions, textbooks, etc. Symbolic Logic is not easy to understand, however Dr. Agler's eloquence and care makes this course a piece of cake. He is intelligent, and is very well equipped in translating a (basically) foreign language & all of it's intricacies within the span of 1 semester. He provides different perspectives for different students to ensure that everyone can understand the same topic in different ways. He is accommodating and understanding, responds to emails fast, and genuinely wants to work with students so that they can succeed. I truly cannot praise this professor enough. Honestly, it amazes me that a person can explain these topics so well in a logical order. I have absorbed the material of this course and have applied it to everyday use without thinking twice. If there is any way to promote him, please you should award it to him. - FA2023

- PHIL013 The instructor's enthusiasm and high energy, as well as the interesting material covered in the class made me look forward to coming to class. He did an excellent job explaining difficult concepts through humorous examples. The instructor also did a great job challenging the students and encouraging them to think critically by posing very interesting questions. I also appreciated how eager the instructor was in hearing our feedback for the course and his willingness to implement the suggestions. - FA2014
- PHIL013 The teacher used many different ways to get his point across, which helped understand a lot of lessons. He used videos, drawings on the blackboard, lecture, and group thinking to get ideas across. Talking among a group made me learn the most because it helped to hear other people's interpretation of what was just being lectured. - FA2014
- PHIL123 Via email: My name is [redacted], and I was a student in your Leap Media Ethics course. I am emailing you to say thank you for making the most out of the summer course! I learned so much through it and I felt more prepared in my journalism classes this semester. Whenever I had a question about journalism, I would use your old slides and the textbook of the course. Your class truly helped me with my transition into college life, especially the leap activities. From those activities, I was able to form a list of organizations I wanted to be a part of and internship opportunities. I am currently a news anchor for Penn State Network Television and a digital content intern for Penn State Athletics. I wouldn't have been aware of all these opportunities without your help. Thank you so much for everything and I hope you had a great semester! – Spring 2021
- PHIL123 David is an amazing teacher who loved to help the class understand every single topic. He clearly cares about his students which really allowed us to care about him and the course in return. – Summer 2021
- PHIL123 The professor was wonderful. The learning environment was friendly, the course content was informational, and the communication was exceptional. Although I did not meet Mr. Agler in person, he seems like one of the kindest professors who cares about his students. It was obvious that he wanted us to be successful in his class– he taught us so much, and he was always up for answering questions, whether it was through email or setting up a zoom. He seems to really love teaching, and his positive attitude is contagious! I'm glad I took his class, it was informational and enjoyable. I can't say enough positive things about him and his class! – Summer 2019
- PHIL297 I'm going to use this space to express how much I liked David because there isn't one. David was awesome. I really enjoyed his lectures, the way he explained things, and his passion for the subjects. Great work! - FA2016
- PHIL205 Our professor really explained ideas thoroughly, used clear examples, and printed out note packets that helped us follow along. Overall, I learned a lot in this course and I really enjoyed it.
- PHIL205 The packets that were handed out during class made it easy to follow lectures and understand the important points within the class. I also loved the way the class assignments were organized because it made me prepare for the essay I had to write. Also, the assignments made sure I understood the material we were learning. – Spring 2019

- PHIL205 Professor Agler made some conceptually challenging concepts very clear. He always had an example that made things make sense. He also has a very good sense of humor, and incorporates it as best he can with lectures. Also, I think he did a great job once we moved to remote learning; he clearly has some internet prowess. – Spring 2019
- PHIL205 What helped me learn in this course was the thoroughness of Professor Agler's teaching. He made sure that everyone understood some difficult concepts without making the students incompetent. I had no prior knowledge to anything philosophy based and I feel that I have learned so much in this class. – Spring 2020
- PHIL401 The lectures were thought out and organized, and the corresponding handouts made it much easier to navigate my own notes after class. I really appreciate the effort in organizing the material in these handouts and in the lectures themselves. The inclusion of some visual charts to communicate some relations between concepts was helpful. Also helpful was the instructor's activeness in sharing interesting and relevant materials besides the primary literature outside of class. – Fall 2018
